Union Home Minister and Minister of Cooperation Shri Amit Shah today inaugurated the 'PM Family Care Tracker' pilot project in Gandhinagar, Gujarat. On this occasion, Gujarat Chief Minister Shri Bhupendra Patel, Union Home Secretary Shri Govind Mohan, and many other dignitaries were present.

In his address, Union Home Minister and Minister of Cooperation Shri Amit Shah said that whenever anyone writes the 100-year history of India after Independence, that history will have two parts. The first part will be India before 2014 and the second part will be India after 2014. In the 2014 elections, the people of India elected the then Chief Minister of Gujarat, Shri Narendra Modi Ji, as the Prime Minister of the country. He said that after 2014, under the leadership of Prime Minister Shri Narendra Modi Ji, a huge transformation has taken place in every sector of the country. Prime Minister Modi has created a new definition of comprehensive and all-encompassing development of the nation. Shri Shah said that the Modi government has not only formulated long-term policies in every sector but has also monitored them and ensured their effective implementation on the ground. Work has also been done to strengthen the country's security, preserve its culture, implement the education policy, boost the economy, develop infrastructure, advance towards self-reliance, and to formulate policies in every sector while making timely improvements in them.

Shri Amit Shah said that under the leadership of Prime Minister Shri Narendra Modi Ji, comprehensive efforts have been made to uplift the living standards of crores of poor people in India. Today, whatever amount of money Prime Minister Modi Ji sends for the country's poor, the entire sum reaches them directly. The Modi government has ushered in a new era of welfare for the poor by introducing Direct Benefit Transfer (DBT). In just 12 years, the Narendra Modi government has provided houses, electricity, tap water, toilets, gas cylinders, 5 kg of free foodgrains, free medical treatment up to ₹5 lakh, and arranged 90 percent affordable medicines for crores of poor people across the country.

Union Home Minister said that the Narendra Modi government has given their rightful share to the crores of people who, since Independence, had been striving to claim their due in a free India. He said that Prime Minister Modi has resolved in just 12 years the problems that had persisted for generations among crores of people in the country.

Shri Amit Shah said that today, a system to track governance for everyone has effectively begun here. Today, children were administered polio doses, and nutrition kits were also distributed. By integrating this entire database and linking it with birth and death data, the task of providing every child with an ID and a unique number will be carried out through the PM Family Care Tracker. Through this platform, the benefits of all government schemes will be delivered.. The PM Family Tracker will create an integrated monitoring system, under which needy individuals will be identified and special attention will be given to them.

Union Home Minister said that Prime Minister Modi Ji has brought about a revolutionary transformation in the health sector of the country. Prime Minister Shri Narendra Modi has launched several initiatives in line with the country's healthcare needs, including expanding the availability of doctors, providing free medical treatment of up to ₹5 lakh to crores of citizens, making affordable medicines accessible, strengthening health infrastructure, and revitalizing India's traditional systems of healthcare through AYUSH. Today, the PM Family Care Tracker has been launched to monitor all these initiatives.
